SUMMARY

Data Analyst/Scientist with hands-on experience in SQL, Power BI, Excel, Python, machine learning, and business intelligence. Skilled at cleaning data, building dashboards, creating SQL reporting views, and translating analysis into clear business insights for stakeholders.

EDUCATION

- M.S. Engineering Science, Data Science - SUNY University at Buffalo, NY May 2025
- B.S. Mathematics - St. Xavier's College, India April 2023

EXPERIENCE

Data Analyst, Part-time - *Community Dreams Foundation*

Sep 2025 - Present

- Developed interactive Power BI dashboards for sales/revenue tracking, budget vs. actual analysis, trends, what-if scenario modeling, and filters by department, time period, and category.
- Created an Excel sales dashboard with Pivot Tables, slicers, KPI cards, and charts to analyze revenue trends, top products, customer activity, and return patterns.
- Supported analytics for a landscaping platform by tracking tasks across website analytics, customer retention, and project tracking over a 3.5-month project timeline.
- Analyzed community program data, created dashboards, and delivered insights to support outreach initiatives.

Data & Operations Intern - Sakhya Women's NGO

Jan 2023 - Oct 2023

- Maintained program, donor, and inventory records through accurate data entry, spreadsheet updates, and routine data checks.
- Organized inventory logs in Microsoft Excel, tracked item availability, and supported documentation for resource distribution.
- Cleaned and formatted spreadsheets to improve record accuracy and prepare basic summaries for internal reporting.

PROJECTS

US Candy Distributor Performance Dashboard - *SQL Server + Power BI*

- Built an end-to-end BI dashboard using SQL Server and Power BI to analyze \$141.8K sales, \$93.4K gross profit, 8,549 orders, 5,044 customers, product performance, factories, regions, and targets.
- Created SQL cleaning and reporting views for KPI, monthly, region, division, product, factory, target, state, and ZIP-level geographic analysis.
- Identified Chocolate as the top-performing division with \$131.7K sales and Sugar as significantly under target at 2.85% achievement.

Online Retail Sales Performance Dashboard - *Excel*

- Built an interactive Excel dashboard analyzing \$1.32M revenue, 23,402 unique orders, 4,346 customers, average order value, top countries, top products, top customers, and returns.
- Used PivotTables, Pivot Charts, slicers, KPI cards, calculated fields, and cleaned transaction data to separate completed sales from cancellations/returns.

Fake News Detection - *Machine Learning + NLP*

- Conducted text classification using Logistic Regression, SVM, LSTM, and BERT, achieving approximately 84% accuracy.
- Deployed an interactive application allowing users to test behavior-driven classification in real time.

Customer Churn Management - *SQL + Streamlit*

- Conducted SQL analysis revealing the lowest churn segment at 9.99% and the highest revenue plan.
- Built a real-time Streamlit dashboard to improve accessibility of customer data and churn insights.

KEY SKILLS

Python | R | SQL | SQL Server | Power BI | Excel | Tableau | Pandas | NumPy | Scikit-learn | TensorFlow | Statistical Analysis | Data Cleaning | Dashboarding | KPI Reporting | Regression | Classification | Forecasting | Predictive Modeling | Matplotlib | ggplot | Documentation | Critical Thinking | Teamwork
